

APPENDIX A-177

WSDB SYSTEM ORACLE ACCESS ROLES CODES (OARCs)

1. Number of characters: One.
2. Type of code: Alpha. (A, B, C, D, E, F, G, H) ascending order
3. Explanation:

A role is a collection of rules that govern an end user's access to the data stored in the data base.

4. Source: The ORACLE Access Roles Codes (OARCs) are determined by the DLSC Weapons Systems manager or DSC weapon system personnel for the applicable data base(s) required to accomplish the mission.

5. The WSDB System Oracle Access Roles Codes (OARCs) are listed and defined as follows:

<u>ROLE</u>	<u>DEFINITION</u>
A	No Access.
B	Access to file menu, inquiry menu reports, goals, logical groupings, notepads, and ad hoc query.
C	Access to file menu, inquiry menu, reports, SQL options, goals, logical groupings, notepads, and ad hoc query. No transactions or goal changes.
D	Access to file menus, inquiry menus, WS1 transactions, reports, SQL options, goals, logical groupings, notepads, and ad hoc query. No master weapon file or goal changes.
E	Access to file menu, inquiry menu, WS1 transactions, reports, SQL options, goals, logical groupings, notepads, and ad hoc query. No weapon system, group code, or DLSC HQ changes.
F	Access to file menu, inquiry menu, limited weapon system, WS1 transactions, reports, SQL options, goals, logical groupings, notepads, and ad hoc query. No WSGC or goal changes. Limited to DLSC personnel charged with data base maintenance responsibilities.
G	Access to all functions except Center goal changes. Assignment limited to DLSC weapon system data base manager.
H	Identical to Role C access but with the addition of Point of Contact change capability.
